

Acceptance Testing UAT Execution & Report Submission

Date	20 September 2026
Team ID	Shaik Irshad - 238W1A4256
Project Name	Automated Network Request Management in ServiceNow
Maximum Marks	4 Marks

1. Purpose of Document

The purpose of this document is to briefly explain the test coverage and open issues of the Automated Network Request Management in ServiceNow project at the time of the release to User Acceptance Testing (UAT).

At release, **19 test cases were executed and all 19 passed**. One defect was logged during testing; it was fixed and closed, and **no defects remain open**. Detailed test cases and results are recorded in the UAT test document (TC-001 to TC-019, BG-001).

2. Defect Analysis

This report shows the number of resolved or closed bugs at each severity level, and how they were resolved

Resolution	Severity 1	Severity 2	Severity 3	Severity 4	Subtotal
By Design	0	0	0	0	0
Duplicate	0	0	0	0	0
External	0	0	0	0	0
Fixed	0	1	0	0	1
Not Reproduced	0	0	0	0	0
Skipped	0	0	0	0	0
Won't Fix	0	0	0	0	0
Totals	0	1	0	0	1

Severity scale: Severity 1 = Critical, Severity 2 = High, Severity 3 = Medium, Severity 4 = Low.

BG-001 (Severity 2 – High, Fixed): the Network Request flow ran in Flow Designer testing but did not run when the request was submitted from the Service Portal. The catalog item was not associated with the flow. Linking the correct Network Request flow to the catalog item resolved the issue, and the fix was verified by test cases TC-009 and TC-019.

3. Test Case Analysis

This report shows the number of test cases that have passed, failed, and untested

Section	Total Cases	Not Tested	Fail	Pass
Form & Validation (TC-001 to TC-007)	7	0	0	7
Submission, Flow & Record (TC-008 to TC-012)	5	0	0	5
Notification & Approval (TC-013 to TC-017)	5	0	0	5
Security & End-to-End (TC-018 to TC-019)	2	0	0	2
Total	19	0	0	19

All test cases were executed through the Service Portal and Flow Designer, covering both positive and negative scenarios (for example TC-002 mandatory-field validation and TC-016 Rejected outcome).
